Subject: Reuse Planning at CES Removal Site in Houston
Date: Wednesday, March 25, 2015 9:43:32 AM

Gary/Susan,

I spoke with Monica Harris about the potential for EPA to offer reuse assessment and planning support at the CES removal site. As Gary had previously indicated, TCEQ was very hesitant to do anything to engage the PRP at the site prior to them enrolling in the VCP. We agreed that we'd wait to initiate reuse planning at the site until the PRP submits an application for the VCP and is accepted. Apparently that process takes about 45 days and TCEQ expects the application in the next few weeks. She was receptive to the benefits of reuse planning for all the CES site stakeholders – the PRP, the local community, the City of Houston as well as TCEQ and EPA. So, we'll be in contact with TCEQ early this summer, after the PRP is admitted to the VCP, to initiate reuse planning at the site. Please let me know if you'd like to discuss further.

Thanks much,

Casey
